Shakespeare and the Power of the Face-

James A. Knapp 2016-03-03 Throughout his plays, Shakespeare placed an extraordinary emphasis on the power of the face to reveal or conceal moral character and emotion, repeatedly inviting the audience to attend carefully to facial features and expressions. The essays collected here disclose that an attention to the power of the face in Shakespeare's England helps explain moments when Shakespeare's language of the self becomes intertwined with his language of the face. As the range of these essays demonstrates, an attention to Shakespeare's treatment of faces has implications for our understanding of the historical and cultural context in which he wrote, as well as the significance of the face for the ongoing interpretation and production of the plays. Engaging with a variety of critical strands that have emerged from the so-called turn to the body, the contributors to this volume argue that Shakespeare's invitation to look to the face for clues to inner character is not an invitation to seek a static text beneath an external image, but rather to experience the power of the face to initiate reflection, judgment, and action. The evidence of the plays suggests that Shakespeare understood that this experience was extremely complex and mysterious. By turning attention to the face, the collection offers important new analyses of a key feature of Shakespeare's dramatic attention to the part of the body that garnered the most commentary in early modern England. By bringing together critics interested in material culture studies with those focused on philosophies of self and other and historians and theorists of performance, Shakespeare and the Power of the Face constitutes a significant contribution to our growing understanding of attitudes towards embodiment in Shakespeare's

England.

Power Relations and Fool-master Discourse in Shakespeare-Clara Calvo 1991 This study undertakes an examination of fool-master discourse in Shakespeare with the help of discourse stylistics, an approach to the study of literary texts which combines findings from the fields of discourse analysis, conversation analysis and pragmatics. The analysis aims to show how the relations of power which exist between dramatic characters are manifested by the linguistic organization of the dialogue as interactive process. Fool-master discourse in Shakespeare is analysed from three different perspectives: the use of the pronouns of address

(you/thou); the organization of the discourse as a whole; and the politeness strategies used by fools and their employers in face-to-face interaction. With regard to the pronouns of address, it is shown that neither a structural model nor a sociolinguistic one are sufficient per se to satisfactorily explain the constant shift of pronoun which occurs in Early Modern English dramatic texts. It is suggested that a model of analysis rooted in discourse analysis and pragmatics ought to be developed. Burton s framework is used to study the conversational structure of fool-master discourse, and to show how the power relations obtaining between dramatic characters are manifested by the internal organization of dramatic dialogue. Politeness phenomena in fool-master discourse are studied following Brown and Levinson s model and it is shown that both the fools and their employers orient to face in interaction. Finally, this study of power relations in fool-master discourse shows that, contrary to much current critical opinion, the fools in Shakespeare are not licensed jesters who enjoy unlimited freedom of speech. Feste, Lavatch and Lear s Fool need to resort to complex linguistic strategies if they want to make their criticisms and, at the same time, avoid being punished.
